

## **Laboratory health and safety training courses at the University of Padua**

Safety training and the related assessment test are required in order to guarantee a safe access to the teaching laboratories and make the students aware of the hazards related to specific environments, activities and procedures.

The safety training takes place online through the study of educational material prepared by the University (link below) and includes:

- **General training-** passing the test involves the issuing of a certificate that the student should print and use both for access to the teaching laboratories and for admission to the internship.
- **Specific training course in health and safety at the workplace-** passing the test involves the issuing of a certificate that the student should print and use both for access to the teaching laboratories and for admission to the internship.

Important → AFTER PERFORMING THE TESTS, STUDENTS MUST NOT CANCEL THE ENROLMENT FROM THE SAFETY AREA OTHERWISE TEST RESULTS CAN NO LONGER BE RECOVERED.

In order to take the courses and the final tests, please log in with your SSO Single Sign On credentials ([name.surname@studenti.unipd.it](mailto:name.surname@studenti.unipd.it) and password of your university account) at:

<https://elearning.unipd.it/formazione/course/index.php?categoryid=40>

**Formazione generale/General training - Health and safety at the work place low risk (4h)**

**Formazione specifica/Specific training - High-risk activities (12h)**

For students who cannot have SSO, the host structure or teacher must request the creation of an access account to the email address [form.sicurezza@unipd.it](mailto:form.sicurezza@unipd.it) specifying the reasons for the access request.

**A certificate will be released at the end of each passed test. The student should download it.**

**The passing of the two tests is mandatory to participate to the teaching laboratories and to the thesis internship**

Previous security training certifications can be accepted for **General training - Health and safety at the work place low risk**; please send the certificate to [form.sicurezza@unipd.it](mailto:form.sicurezza@unipd.it) to ask the validation. No certification can be accepted for **Specific training - High-risk activities (12h)**. Therefore the student must take the course and the test.
